

INVEST IN STUDENTS, SECURE OUR FUTURE

# Harrisburg and Washington, OUR STUDENTS NEED YOU!

Children are struggling to learn during this pandemic. They deserve action from our politicians

# NOW!

Pennsylvania school districts are expecting to lose

**\$1 BILLION**  
AS A RESULT OF COVID.

Meanwhile they have to spend more to educate our students. It costs more for PPE like gloves and masks; cleaning staff and supplies; protective barriers...

- It costs more for - Computers, WiFi, hotspots, software
- It costs more for - Expanded student counseling
- It costs more for - Educating special education and students who have limited English skills
- It costs more for - paying cyber charter schools who spent tax dollars and advertised to recruit students away from virtual programs offered by public schools

Our kids are falling behind because schools are not getting enough resources. It's time for our leaders in Harrisburg and Washington to step up:

- Congress must pass a new stimulus bill that includes more money for our schools. This relief has been stalled for months.
- The state legislature must devote unspent federal COVID-19 emergency funds to help districts meet the additional costs of educating students during the pandemic.

**OUR KIDS ARE STRUGGLING.**

**WE NEED ACTION!**
